

CHEMICAL RECYCLE REUSE

Putting Chemicals Back to Work!

Tradebe's Chemical Reuse program redirects spent chemicals into reusable products. By reusing remanufactured, non-virgin chemicals, chemicals are put back to work keeping them out of our environment.

Tradebe's Sustainable Waste Management approach removes spent material from RCRA waste reporting and management, and minimizes the energy and resources spent on creating new chemicals for industrial applications.

At Tradebe, we recycle over 4 million gallons of spent solvent chemicals into reusable products annually.

Sustainable Waste Management

Tradebe offers sustainable waste management...

Following the Waste Hierarchy, we seek the greenest waste solution possible - with the priority on recycling and recovery first!

Recycling industrial wastes into usable products and substitute fuels is the focal point of our technologies. We continuously strive to develop new innovations to recycle waste so it can be reused in industrial applications.

To find out more about how Tradebe can assist you in achieving your sustainability objectives, visit us on-line at www.tradebeusa.com or call us.

TRADEBE
Sustainability at Work

Recycle Reuse Expansion Completed

In 2019, Tradebe increased its capacity for Recycle/Reuse with an expansion including the addition of two (2) 20,000-gallon cone bottom tanks, as well as facility enhancements for the storage of solvent feedstock material.

This significant upgrade to our capability provides industry leaders in automotive, chemical manufacturing, petroleum recovery and other sectors with increased opportunity for gains in sustainability and cost management.

SELL Your Chemicals to Tradebe

With recovery yields as high as 80%, Tradebe's Chemical Recycle/Reuse group assists clients to:

- minimize hazardous waste generated,
- decrease costs,
- reduce environmental impacts,
- achieve sustainability goals!

Tradebe purchases qualified industrial by-products based on parameters including: quantity, composition, and a representative sample.

Contact us now for assistance in completing a Chemical Reuse Data Sheet in order to verify if your streams qualify for Tradebe's Recycle-Reuse program or our Distillation services.

BUY Reclaimed Solvent from Tradebe

Many industries have discovered the cost-saving benefits of using Tradebe's reclaimed solvents in place of virgin chemicals.

Tradebe's Chemical Recycle Reuse group has processed over 200 million pounds of hazardous material in the last decade through our Chemical Reuse Program and offer several solvent mixtures for sale.

Tradebe sells reclaimed solvents from coast to coast in the US and throughout Europe. These reclaimed products are used in manufacturing and other processes and applications.

These products perform perfectly in place of virgin solvents that were previously used.

Using reclaimed solvent chemicals is the preferred method and integral in controlling costs and most importantly to protect our environment and conserve our natural resources.

Reclaimed Solvent Inventory includes:

- Aromatic Blend: Toluene, Xylene 75-90%, Alcohols 3-10%, Ketones 1-10%, Esters 1-2%
- Acetone Blend: Acetone 50-60%, Xylenes 10-20%, Ketones 5-15%, Esters and Alcohols 5-10%
- Toluene Blend: Toluene 95-98%, Xylene 0.5-2%
- Aliphatic Blend: Aliphatics 70-85%, Aromatics 1-5%, Alcohols 1-10%, Esters 1-10%
